

## LTSG PC Suggestion (9/29/11)

If you are thinking about purchasing a new PC, look for a model that is designed for office use and intended to run in a networked environment—a machine designed for home entertainment or game playing might not necessarily be as suitable. Consider that the computer you purchase today needs to be capable of maintaining solid function, upgradeability and performance for several years.

### PC Desktop/Laptop/Notebook Specifications

<b>Item</b>	<b>Description</b>	<b>Equivalent or Better Specification</b>
Processor	Intel i5/i7 multi-core	2.0+ GHz
